

Airport Wayfinding Guide Passengers Every Step of the Way

Passengers interact with the screen to retrieve directions to their selected destinations through a combination of signals and visual cues

Enhance Passenger Experience

Ease the passenger's self-guided journey throughout your airport by eliminating the stress of being in an unfamiliar location. User-friendly maps of your interior floors and touchscreen panels allow for intuitive and easy navigation.

Streamline Core Operations

Through quick & independent retrieval of directions, similar guest inquiries to your staff are reduced. The touch-interface mirrors how your travelers use their cell phones, inviting interaction on a familiar medium and promoting self-service.

Increase Revenue Streams

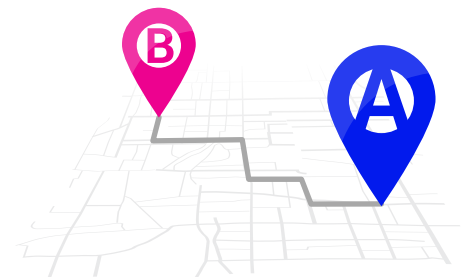

Highlighting your concessions & services, wayfinding directs traffic to your revenue centers. Passengers are presented with a comprehensive picture of your offerings, allowing them to make better-informed decisions on where they spend their time.

Turn-key Custom Solution

Our in-house teams of graphic designers, engineers and project managers handle all aspects of your wayfinding system from ideation to installation. Each solution is customized to suit your vision and unique operational needs.

24/7 Monitoring & Support

Your wayfinding system is continuously monitored to ensure uptime performance. In the event of an outage, alerts are pushed to our support team, allowing proactive measures to be taken and minimizing potential downtime.

Airport Wayfinding

User-friendly Maps
Interactive, user-friendly maps of your facility make it simple for guests to locate restaurants and shopping opportunities.

You Are Here Beacon
The beacon elicits user attention to a specific, configurable location on the map, which serves as the starting point for all routes.

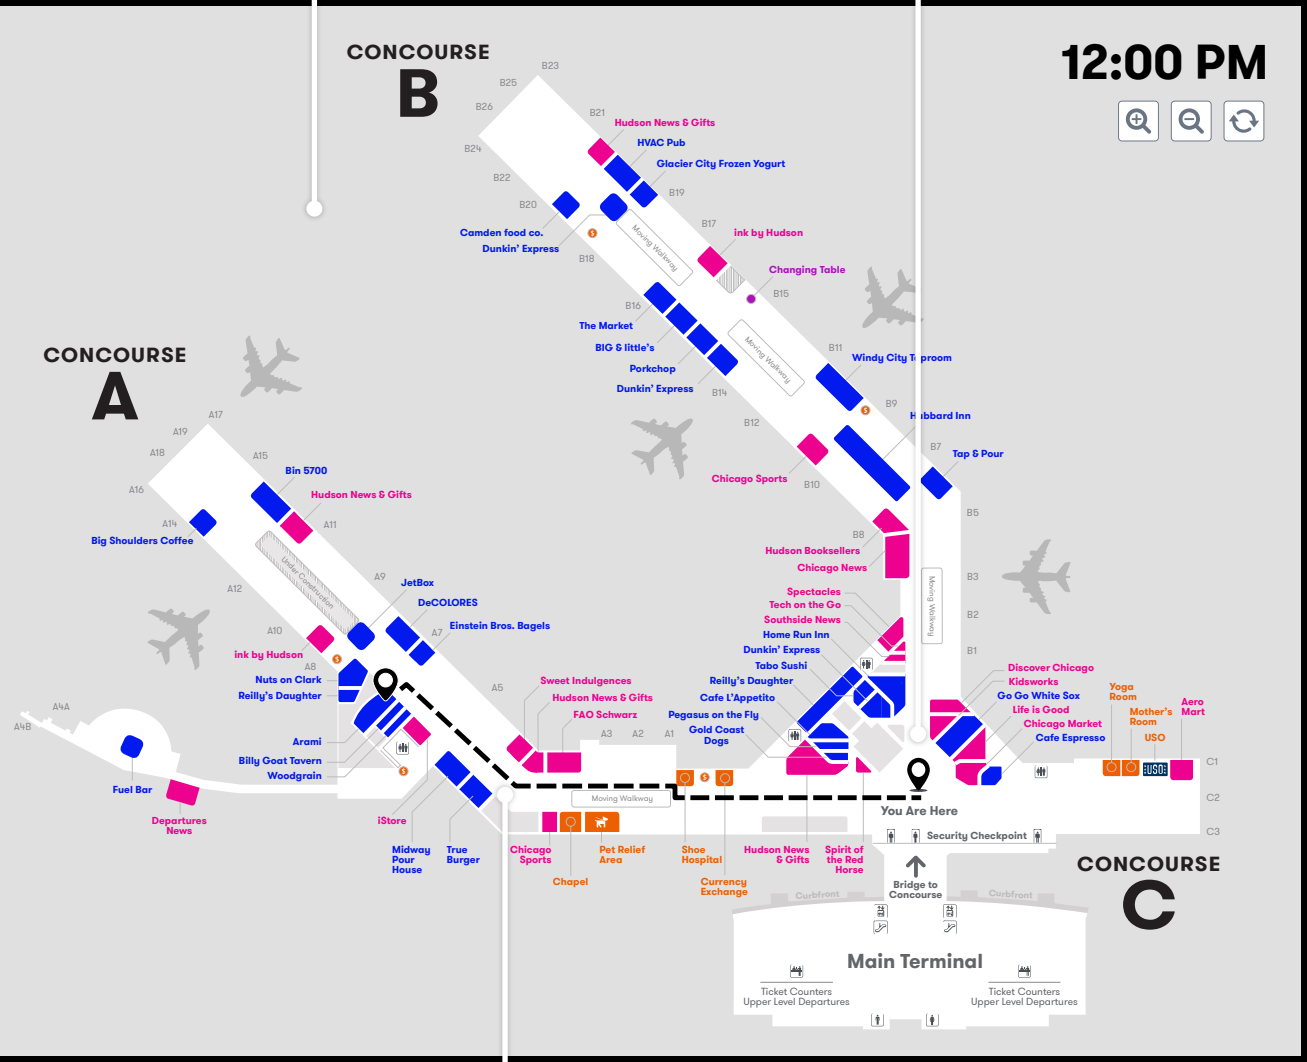

Arami Chicago Restaurant

Ty Fujimara's West Town Japanese restaurant promises not only some of the city's best sushi, sashimi, and maki but also an amazing sake and cocktail list.

🕒 5:00 AM - 10:00 PM

🏠 [Back to Dining](#)

Interactive Information Panel
Passengers interact with the touchscreen to access your concessions, services, shops & more. The panel intuitively responds to common touch gestures like tapping and swiping.

Animated Pathways
An animated pathway is drawn from the user's location to their specified destination, allowing for easy navigation based on visual cues and signals.
